# The Williamsburg Times

---

Volume 1      Some info omitted for web publishing

**Welcome** to the second edition of our community newsletter! We have successfully made it through some very cold weather, and it seems that spring is just around the corner! Our trees have enjoyed a much needed trimming, and the foliage will soon begin to appear. As this newsletter develops, we hope that you will contribute ideas for topics that may be fun and interesting for our community. Anyone up for doing movie or restaurant reviews? Local theater? Let us know and we'll add a column with your interests.

---

## Highlight's from the February board meeting:

The board met on Wednesday, February 14th in the Clubhouse. Vic Bosnich from Veracity, reported that our financial situation has improved and we are now current with all suppliers that provide services needed to maintain the property.

The Financial Report: Info omitted for web publishing

---

We had an open house on Sunday, February 24th in the clubhouse. It was a great time for people to mingle with friends and meet new neighbors. It was a great turnout, and we look forward to hosting another one soon!

## Upcoming events at The Williamsburg:

Lori Peniche has arranged two incredible opportunities for Bonnie Bradshaw, to come to the Clubhouse for a program in both March and April. Bonnie is a Texas Master Naturalist, a certified wildlife rehabilitator, and the former director of the Texas Discovery Gardens, which was the first certified organic public garden in the state.

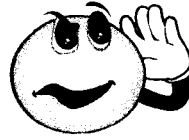

Tuesday, March 27th, 7pm: **Living with Urban Wildlife**

Find out the "stranger than fiction" facts about the native Texas wildlife, including coyotes, bobcats, bats, cottontail rabbits and opossums. These animals, as well as others, live amongst us, even in the most urban areas. They often go unnoticed, but sometimes they seem a little too noticeable. Learn all about how and why they enjoy life in the big city!

Tuesday, April 24th, 7pm: **Patio Gardening for Butterflies Made Easy**

Learn how to create a nursery for butterfly babies in your garden. Discover how to identify the most common butterflies found here in North Texas. Find out the differences between host plants and nectar plants, and how they can be used to attract a wide variety of butterflies to your yard.

These events will be held in the Clubhouse and you are welcome to bring guests!

## HEARD AT THE WILLIAMSBURG

In this edition of the Homeowners newsletter, a new feature is being introduced. "*Heard at the Williamsburg*" will give all of us a chance to become more familiar with our neighbors and friends.

With that said we invite all of our residents to let us know what's "new and newsworthy." All of us would like to hear about birthdays, births, anniversaries, graduations, new residents, job promotions, items for sale, charity events, visiting grandchildren. Write and submit a short piece about vacations, or any exciting event that you would like to share. We have a great community, so let's become better acquainted.

We'd like to thank everyone who has helped make our community a better place this past year. We would like to specially recognize certain individuals whose efforts were instrumental in allowing us to transition into a self-governed property, including: Barbara Harrison, Trey Jordan, Diane Ledford, Kateri Ewing, Beverly Edelman, Lynette Ortasic, and Linda Kempter. Linda is going to take care of keeping our e-mail and contact list current. If you have a change in your e-mail address and/or telephone number, please send them directly to Linda Kempter.

There are too many people who have contributed to name everyone here, but please know how much we appreciate each of you!

That's all for now – hope we'll see you soon.

Please remember that the best way to contact board members is via email or putting your issue in writing.
